SKILLS

Data Preprocessing
Data Analysis
Data Storytelling
Data Visualization
Machine Learning Algorithms

EDUCATION

Master Data Science
2024-Present
Esfahan University

BSc Computer Engineering
2018-2024
Qom University of Technology
GPA for Last Two Years :
3.59/4.0

PROFILE

I am a data science student eager to gain practical experience through a part-time internship. With a foundational knowledge in data analysis, I am enthusiastic about applying my skills to real-world challenges while learning and growing in the field.

EXPERIENCE

Internship Artificial Intelligence
May 2024- Jul 2024
I completed an internship at Becomexpert, focusing on artificial intelligence for one term. The program covered machine learning concepts such as model building, feature selection, and evaluation metrics, and we worked on a significant project applying these skills.

Internship Data Analyst
May 2023- Jul 2024
I completed introductory and advanced data analysis internships at Karyar, with the first term supervised by Digikala. During the program, we worked on a movie dataset, where we started by preparing the data for analysis, including extensive data cleaning and preprocessing. We then applied libraries like NumPy, Pandas, Matplotlib, and Seaborn to analyze and visualize the data, further developing our technical skills and teamwork experience.

CERTIFICATES

DATA ANALYSIS WITH PYTHON
Jun 2023
VERSION CONTROL WITH GIT
Aug 2023
ADVANCED PYTHON AND OBJECT-ORIENTED
Oct 2023
SQL
Oct 2023
